

The conjunction of our knowledge in RTM & INFUSION process
Our know-how at the service of your composite projects

AMS2750 compliant

Resin injection machine

Customized composite curing ovens

Laboratory & composite expertise

Our references :

Tailor made solutions for quality composite products

RTM & Infusion injection machines

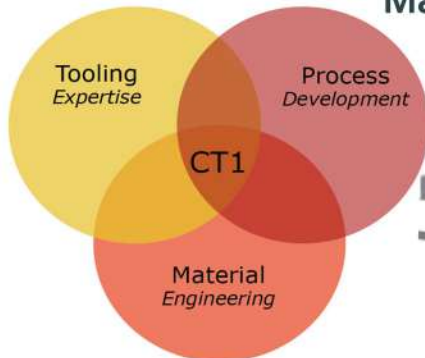

Standard & tailor made curing oven up to 750°C

For all types of aerospace qualified resins :
 - Thermosets : RTM 6 / RTM 6-2 / PR520
 - High performance thermoplastics resins

- Composite curing oven
- Vacuum lines
- Accurate temperature
- Fully control of curing process
- NADCAP Certified
- Complete process report
- Opened customizations

Innovative Project Management

- Laboratory
- 3D calculations
- Tooling expertise
- Process development
- Material engineering
- Testing
