

Industrial Heating Equipment

sat

The heat treatment expert
in forced air convection since 1953

Industrial furnaces

Industrial ovens & furnaces

Polymerisation of Composite Materials

Compo - SAT Range

- Heat your parts faster with the best heat distribution throughout the work chamber
- Designed for a temperature uniformity up to $\pm 2^{\circ}\text{C}$
- Comply with the most severe standards: BAC 5621, AMS 2750, Nadcap (...)
- Save your energy consumption with SAT's best designed oven insulation
- Heavy & quality construction for a reduced maintenance
- Vacuum and air pressure systems for an optimised production

Standardized & tailored- made conceptions

From 20°C to 450°C

From 1 to 12 m^3 for our standard range
